

Guidelines for BSACI Conference Abstract Submission

2021 Annual Conference

The Scientific Committee at BSACI promotes innovative work that improves care for patients and our understanding of allergic disease. We therefore invite you to submit an abstract summarising your work.

All accepted abstracts will be awarded space for display throughout the conference and adjudication during the poster session at the meeting.

Delegates will present their posters and receive feedback during adjudication. Judges will consider the work presented in terms of:

- Originality and quality
- Relevance to practice
- Presentation and discussion of poster

Six Barry Kay Awards are conferred upon presenting delegates each year. One award is given in each of the following Judging Categories:

- Basic Science
- Adult Clinical
- Paediatric Clinical
- Primary Care
- Allied Health
- Undergraduate

Abstracts for the 2021 Education Initiatives Showcase

At the 2021 conference there will be a session dedicated to Allergy Education. We are looking to showcase initiatives that have been undertaken in improving allergy education in any area. You may have been involved in adapting your existing educational strategies for patients/parents in response to the COVID-19 pandemic, or have undertaken a quality improvement or research project to enhance student/trainee allergy knowledge. If you have, we would like to invite you to share these with us. We will be selecting four projects to highlight at the dedicated Allergy Education session during this year's conference, with a broad selection of criteria; the projects could be novel, far-reaching, easily replicated, cost-effective or most accessible. If you would like your project to be considered, kindly submit it as an abstract in the abstract category that it most closely falls into, and

then indicate in the submission system that it is a project to be considered for this year's dedicated education session.

Previously presented (encore) abstracts

Unpublished abstracts that have been presented at a different scientific meeting within a 12-month period prior to the BSACI conference, provided they contain updated/additional data, can be submitted and will be considered for presentation. Abstracts submitted for publication or to a scientific meeting, but are pending acceptance, can be submitted without restrictions.

Submitting your Abstract

Please ensure:

- abstracts are submitted before the deadline: **midday Monday 17th May 2021.**
- the abstract is no longer than 300 words (approx. 2000 characters)
- the title is no longer than 25 words (approx. 150 characters)
- authors' names are submitted in the format ' A. Smith'
- abstracts are structured using:
1.Objective, 2.Methods, 3.Results and 4.Conclusions
or for case presentations using:
1.Background, 2.Case presentation, 3.Discussion and 4.Conclusions
- your abstract contains the results data. Any 'unfinished' abstracts (promising fresh results on the poster) *will be rejected*
- the submitting author is the presenting author (all information regarding the process, selection and display/presentation of the abstract will be sent to the submitting author).

Tables and charts

Tables and charts can be included in your submission.

Take care with your submission ...

Abstracts cannot be edited after the submission deadline on the online system.

The submitting author is required to ensure that all co-authors agree for their names to support the submission, and that co-authors agree that the data reported can be considered for publication in our journal *Clinical & Experimental Allergy* using the same abstract submission.
